

Block dimensions are measured to the exterior boundaries of the exterior walls and do not vary from the dimensions that would be determined by using the Description (which generally only includes the interior spaces between the perimeter walls and includes interior structural components). Additionally, measurements of rooms set forth on any floor plan are generally shown at the greatest points of each given room (but the room were a perfect rectangle), without regard for any outside. Accordingly, the area of the actual room will typically be greater than the product obtained by multiplying the stated length times width. All dimensions are approximate and all floor plans and development plans are subject to change.
